

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

INTRODUCTORY.

AT a reunion of the past members of the North Brookfield High School, held December 2d, 1878, the need of a Free Public Library and Reading Room for the town was discussed, and it resulted in the appointment of a committee to solicit money by subscription for the purpose of aiding in establishing and maintaining a Free Public Library and Reading Room.

The sum of two thousand dollars was subscribed, which amount was accepted by the town at an adjourned annual meeting May 10, 1879.

The town appropriated one thousand dollars additional, and elected a Board of Trustees consisting of nine — (three for three years, three for two, and three for one year) — who were authorized to receive all moneys that had been, or might be, given for this object.

The following named gentlemen were first elected

TRUSTEES:

Theo. C. Bates, W. H. Montague, N. H. Foster, for 3 years.
James Miller, G. H. De Bevoise, John B. Dewing, " 2 "
J. M. Avann, P. J. Downey, Sumner Holmes, " 1 year.
who met and organized May 21, 1879, by the choice of Theo. C. Bates, President; J. M. Avann, Secretary; James Miller, Treasurer.

Rooms were secured and fitted up in Walker Block, and the Reading Room formally opened to the public Thanksgiving Eve, November 26, 1879.

The first purchase of books for the library was made February 11, 1880, and consisted of about fourteen hundred volumes (1400,) which were catalogued, and the Library opened

for the issue of books March 30, 1880. A second purchase of eight hundred books (800) was made January, 1881, and supplementary catalogue No. 2 was issued. Another addition of about eleven hundred volumes (1100) has recently been made, and are now catalogued with Nos. 1 and 2, which have been revised, and all are published in this book, making a total number of thirty-three hundred (3300) volumes in the Library.

The labor of preparing and revising the catalogue has been performed by the Librarian, who is alone responsible for its completeness.

The work is designed as an index to the contents of the Library for the use of pupils in the schools as well as the general reader.

The books are entered in the catalogue twice—under the author's name and under the first or leading word of the title. Some works for greater clearness, are catalogued again under a sub-title, and works of a complex subject are often entered several times. Works bearing upon the same special subject are also grouped together, and in addition to this all the books are classified under fourteen General Subjects, and the class to which a book belongs is indicated by Roman numerals. Works published under pseudonyms are catalogued with cross references under the real name of the author.

Books in the French language are classified by authors and will be found on the last pages of this catalogue, and also a list of books in the Reference Department.

All new books which may be added to the Library from time to time will be thoroughly catalogued under the *Card System*, and supplements to this catalogue will be issued when necessary.
